

patron®
creative in care

Technology

Universal modular interface of chassis and another subcomponents of travel system are characterized by a simple, user-friendly operation and a high level of passive safety.

The products equipped with a color coating set allowing a very efficient, simple and inexpensive „re-coloring“ of your stroller. Imagine that you have a bright color for summer and a decent color for the winter or a new fashionable color for another sibling on the same component.

Another sibling or twins? You are ready with us!
Strollers and components with clip-A-go interface are specially designed to allow flexible, quick and cheap configuration of the stroller for need purpose, as an example for younger sibling.

Space extender - a unique feature for setting the component's to optimal position (carrycot, seat, car seat) for a sibling stroller and twins.

Traditional European production

Traditional European production

Welcome on your journey with PATRON

We believe that it is really important to take care about choosing the right pram. A vehicle that you and your baby are going to take for your the first common journey. Whether it takes you to the wide boulevards of big cities, the streets of shopping centers or the rugged footpath of our countryside, with us will be ride always safe and comfortable.

How do we know it?

We do not underestimate anything when we are developing our strollers. We are using modern technology for designing and manufacturing, We are thoroughly testing all our strollers according to the latest standards and we are carefully checking each piece before shipping to you.

How to choose?

We understand that each person's style is absolutely unique. That is reason why we are introducing to you our unique modular system. It offers the ability to assemble a stroller exactly to your individualy needs and respect your unique style.
